

## Outsourced Risk Management

High-level risk management services offered on an as-needed basis.

Holden Risk Advisors can save your company money and free up your valuable resources by providing industry-leading outsourced risk management services.

Insurance and risk management is a critical function within a company. However, it is often difficult to justify deploying dedicated resources with the appropriate experience to manage this critical role.

The risk management professionals at Holden Risk Advisors can assist in managing your insurance program on an interim basis or on a fully engaged basis, perform the necessary services in a focused, results-oriented manner and provide a transition plan for the risk management needs of the company.

**Short-Term:** Ideal for companies that need assistance during the renewal of the insurance program.

**Medium-Term:** For companies that need assistance during a transition into a more permanent position.

**Long-Term:** For companies that prefer to utilize Holden Risk's experience to manage their insurance program.

The professionals at Holden Risk Advisors are knowledgeable of leading insurance and risk management practices in the industry and can help identify where cost savings may exist without sacrificing insurance protection.

We can conduct a review of your insurance and risk management program that will provide documentation of your company's current state, industry best practices, and opportunities for improvement. These opportunities will be classified into categories of importance and management action plans can be developed for each to create a road map for success.
